Hi Group,

Learning outcomes of this module:

1. Differentially diagnose a wide variety of skin lesions
2. An ability to differentiate between benign and malignant lesions and an understanding of the appropriate referral pathway and treatment guidance.
3. Critical appraisal of the evidence relating to the management of skin lumps and bumps.

With the above borne in mind, this week we have looked at the following:

- Dermatofibroma
- Neurofibroma
- Pilomatricoma
- Sebaceous naevi
- En coup de sabre
- Epidermoid cyst
- Gardner syndrome
- Dercum's disease
- Lipoma

- Gardner syndrome
- Dercum's disease
- Sebaceous hyperplasia
- Aplasia cutis
- Angiokeratoma
- Pyogenic granuloma

It has been really good week first week!, well done all !. I look forward to reviewing your reflective diary entries.
